WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/SG2004/000010

Box No. I Basis of the opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.  
☐ This opinion has been established on the basis of a translation from the original language into the following language , which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
  - a. type of material  
☐ a sequence listing  
☐ table(s) related to the sequence listing
  - b. format of material  
☐ in written format  
☐ in computer readable form
  - c. time of filing/furnishing  
☐ contained in the international application as filed.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additional comments:

International application No.

**PCT/SG2004/000010**

**Box No. V** Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

**1. Statement**

Novelty (N)	Claims 21	YES
	Claims 1-20, 22-23	NO
Inventive step (IS)	Claims	YES
	Claims 1-23	NO
Industrial applicability (IA)	Claims 1-23	YES
	Claims	NO

**2. Citations and explanations:**

The International Search Report completed by the Australian Patent Office on 29 April 2004 identified the following documents as relevant.

**D1 : US 2003/0207694 A1**

**D2 : DE 29820552 U1**

**D3 : US 6311052 B1**

Claims 1-23 are directed toward a wireless communication system in which a client unit can listen to multiple radio channels concurrently.

Claims 1-20 and 22-23 are not novel in light of D1 which discloses said claims.

These claims also lack an inventive step in light of the disclosure of D1.

Claims 1-20 and 22 are not novel in light of the disclosure of D2 which discloses all features of said claims. Claim 23 of the present application adds the feature of a headset however these are well known in the art as can be seen from D3. Thus claim 23 lacks an inventive step in light of either D2 with common general knowledge or the disclosures of D2 and D3 when combined as would be obvious to a person skilled in the art.

Claim 21 is not explicitly disclosed in any of the listed documents. It is considered that bluetooth is an obvious choice of protocol for wireless communication and thus claim 21 lacks an inventive step in light of either of D1 or D2 when combined with common general knowledge in the art of radio communication.

Claims 1-23 find industrial applicability in the field of radio communications.
